

## What's So Special About the Aeroneb GO??

The Aeroneb GO is a totally unique nebulizer treatment for pediatric and chronic asthma, COPD, or any condition indicating aerosol medication. The OnQ™ technology delivers a totally uniform aerosol that translates into the most efficient treatment times available.

- Not only is the treatment quicker, fewer meds are swallowed during treatment, so the patients don't have as many adverse reactions to the medication.
- There is also no wasted medication with the Aeroneb GO. The OnQ™ micro pump uses 100% of the medication.
- The Aeroneb GO is completely silent. This allows treatments without attracting extra attention. It is so quiet; it won't even wake a sleeping child.
- The Aeroneb GO is the only nebulizer to run on standard "AA" batteries, making it the obvious choice for the car, sleep-over's, play dates, travel, camping, emergency and disaster preparedness, or any treatments when you are on the go.
